

Extending the Cloud Experience to the Edge

Acceleration of Digital Transformation and Data

Digital transformation has become the driving force for organizations to shift their business and technology strategy, approaches, and mindsets. Simultaneously, data is exploding at the edge of the network (resulting from more devices, machines, sensors and applications). Organizations realize they must innovate – and invest – in edge computing technology solutions to keep pace with digital transformation and data acceleration demands.

**Worldwide Edge Spending Guide from IDC*

Extend the Agility of the Cloud – to the Edge

With ZEDEDATA, organizations can:

- **Reduce the cost of managing and orchestrating** distributed edge infrastructure and applications – increasing visibility, security, and control
- **Ensure extensibility and flexibility** by utilizing an open partner ecosystem with a robust app marketplace
- **Gain open architecture built on EVE-OS**, from the Linux Foundation (EVE-OS is a lightweight, open source Linux-based engine, with open orchestration APIs)

You'll also achieve:

- **Zero Limits** – for edge infrastructure options, guest operating systems, applications, network configurations and clouds
- **Zero Touch** – for deployments of edge infrastructure and applications, simplifying installation and bringing the experience of the cloud to distributed locations
- **Zero Trust** – security model addressing the unique, perimeter-less security challenges of edge infrastructure deployed outside of traditional data centers

Testimonials

"With ZEDED A we've been able to reduce the overall device provisioning and field installation time by up to 75%."

– PV HARDWARE

"ZEDEDA has been a true partner in assisting us every step of the way to ensure the success of the implementation. Our collaboration also triggered changes in the product for our needs in a true spirit of co-creation."

– BOBST

"ZEDEDA plays a key role in allowing us to securely deliver industrial edge solutions to any customer. Even in the far reaches of organizations, customers can deploy core applications and securely access valuable machine data."

– Rockwell Automation

About ZEDEDA

ZEDEDA makes edge computing effortless, open, and intrinsically secure – extending the cloud experience to the edge. ZEDEDA reduces the cost of managing and orchestrating distributed edge infrastructure, while increasing visibility, security and control.

ZEDEDA ensures extensibility and flexibility by leveraging a partner ecosystem, and EVE-OS, open-source Linux-based edge operating system.
